Introduction

After several years of development, Dogecoin has long become a well-known cryptocurrency and has a huge community of users around the world. Compared with Bitcoin, the price of Dogecoin is very low, and it is very popular among retail investors. Dogecoin is essentially a mockery of retail investors to institutions, and it is also a victory for the spirit of **YOLO**. Its return on investment even surpassed Bitcoin at one time.

CryptoDOGS inherits the YOLO spirit of Dogecoin and is a 100% community-driven blockchain project. Initiated by the core admin from the ccdogecoin community, CryptoDOGS is developed based on the Binance Smart Chain. It aims to introduce the spirit of Dogecoin into other public chains and create a DeFi version of "Dogecoin".

About CryptoDOGS

CryptoDOGS is an open source blockchain project initiated by the core admins of the original cdogecoin community, dedicated to bringing dogecoin to DeFi and providing a decentralized autonomous community for dogecoin enthusiasts worldwide. Early CryptoDOGS will

be first deployed on the BSC smart chain, and will gradually expand to other public chains such as Ether and Solana in the future.

CryptoDOGS will initially focus on lock-in airdrop and automatic revenue, and will later go live on Swap and NFT platforms one after another.

CryptoDOGS is the world's first 3A type (auto-gain, auto-deflation, auto-marketing) token. Compared with dogecoin and Shiba inu, CryptoDOGS has limited total issuance and permanent deflation, supports auto-gain, and is a typical representative of third generation meme tokens. In addition, holders of CryptoDOGS can participate in up to 300% lock-in mining.

CryptoDOGS

Value

COMMUNITY

Cryptodogs is a 100% community-driven open source blockchain project.

COOPERATION

We are committed to building a cooperative and win-win blockchain community and creating a WSB community in the blockchain field.

DOGE

Dogecoin pioneered the meme token and has built an extremely large community worldwide. CryptoDOGS was founded by the original core admins of ccDogecoin to fill the gaps in the dogecoin economic model and to carry forward the dogecoin community spirit.

YOU ONLY LIVE ONCE

People only live once, some live in the moment, some have fun in time, some live up to their life, some regret their life. We have owned valuable bitcoins and worthless dog coins; we have experienced numerous bear markets, but found no courage to take the bottom; we hope to write our life with extraordinary, but let mediocrity become the note of life.

YOLO is the core value of CryptoDOGS community, YOLO symbolizes debauchery and living up to this life. Every CryptoDOGS member pursues not perfection in everything, but a life without regret. In the pursuit of YOLO, you are not alone in the battle.

Why CryptoDOGS

CryptoDOGS is developed based on BSC in the early stage and will gradually support other public chains such as Ether and Solana in the future, eventually forming multi-chain support. Compared with other meme tokens, CryptoDOGS has obvious advantages, such as lower cost, automatic destruction, support for multiple chains, etc.

First 3A Token

Auto-Farming

Holding tokens can automatically obtain income without complicated operations such as authorized pledges. 1% of each transaction will be allocated to token holders.

Auto-Market-Maker

2% of each transaction will automatically enter the black hole address and be permanently destroyed. Compared with long-term inflation tokens, deflation is conducive to the continuous increase in the value of tokens.

Auto-Deflation

1% of each transaction automatically enters the liquidity pool.

Locked Mining

Earn Rewards Just Hodling in your wallet!

- 2014,we missed bitcoin;
- 2020,we missed dogecoin;
- 2021,we missed shiba inu;
- 2022,we missed floki inu;
- We only live once;
- We can't missed opportunities any more!

In order to motivate the core supporters of CryptoDOGS, we have introduced the feature of lock-in mining. Locked position mining allows users to hold CryptoDOGS for a long period of time to avoid getting off early and increase their investment returns.

- **500%**

Locked mining up to 500% return.

- **Multi-mining**

Locked mining also can receive auto farming profit, that's means we got multi profit.

- **Raise+**

Locked mining can make everyone holding CryptoDOGS, enjoy the benefits of rising CryptoDOGS prices.

CryptoDOGS Swap

Doge Swap is a cross-chain aggregated trading protocol based on the AMM mechanism that allows users to exchange various types of crypto assets in a decentralized wallet. Users can also earn transaction fees by providing liquidity on CryptoDOGS Swap.

CryptoDOGS Swap will be the world's first decentralized exchange to support Dogecoin cross-chain exchange, and will go live in the future with liquidity mining, airdrops, and many other ways to play.

The screenshot displays two overlapping interface panels. The foreground panel is the 'Swap' interface, which includes:

- Swap Tab:** A 'FROM' field with the value '1' and a 'MAX' button. The input asset is 'BNB' with a balance of '\$276.85'. Below this is a 'TO' field with an estimated value of '10,000,000,000' and the output asset 'CryptoDOGS' with a balance of '100,000,000'.
- Price and Pool Share:** A section labeled 'PRICE AND POOL SHARE' showing '0.0000000 BNB per 1 CryptoDOGS' and '0.5% Share of Pool'.
- Buttons:** A blue 'Swap' button and an 'Advanced settings' dropdown.

The background panel is the 'Pool' interface, titled 'Add liquidity to receive LP tokens', which includes:

- Pool Tab:** A 'FROM' field with 'MAX' and '1' (BNB) and a balance of '\$276.85'.
- Pool Tab:** A 'TO' field with 'MAX' and '100,000,000' (CryptoDOGS) and a balance of '\$276.85'.
- Buttons:** A blue 'Provide Liquidity' button.

CryptoDogs NFT

CryptoDOGS NFT is the world's first MEME themed series of NFT trading platform, the main NFT concepts are CryptoDOGS, Dogecoin, Shiba inu & Floki and so on. Unlike general NFT trading platforms, CryptoDOGS NFT will be the first decentralized protocol that supports NFT DeFi mining.

NFT lending

The CryptoDOGS NFT platform allows users to pledge various types of different NFT assets for lending, which helps release sunk funds in the NFT market with an initial pledge rate of 1000%, which automatically triggers liquidation when the pledge rate falls short.

NFT Mining

CryptoDOGS NFT platform supports liquidity mining, users can participate in NFT casting and trading in the platform can get CryptoDOGS rewards, in addition, users can also pledge NFT assets for mining.

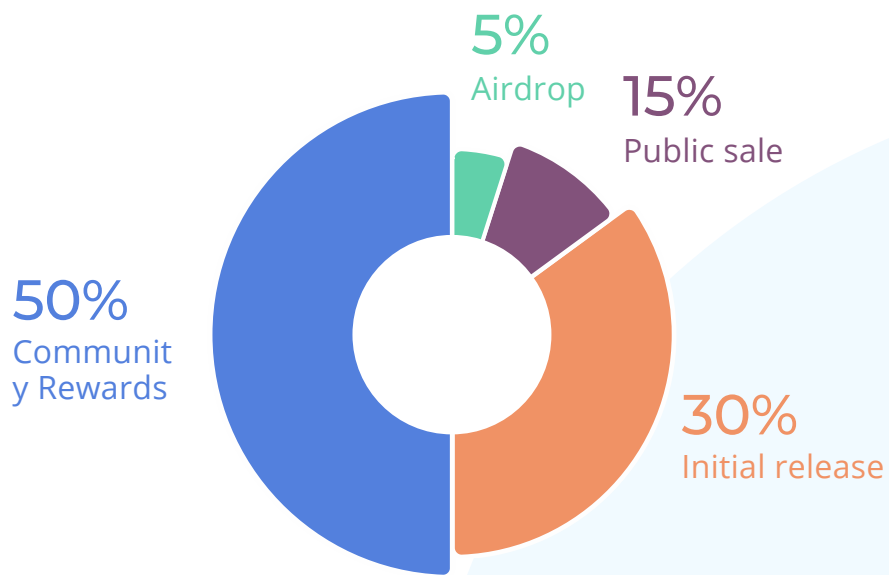

CryptoDOGS DAO

CryptoDOGS is a 100% community-driven project where governance decisions will be made on the chain. 2% of the revenue generated in the CCDOGE ecosystem will automatically go into the DAO vault. CryptoDOGS holders can participate in DAO governance, initiate proposals, participate in voting, etc.

Token Distribution

CryptoDOG is a native governance token for the CryptoDOGS ecosystem, issued based on the BEP20 standard, with a total supply of 21 trillion.

1
PHASE

YOU

- Launch official website, deploy Smart Contracts.
- Market warm-up, early business cooperation.
- Launch social media sites, twitter, telegram, etc.
- Begin first round of community airdrops.
- 1,000 telegram members.
- Launch locked mining.
- Apply for listing on Coinmarketcap.
- Apply for listing on Coingecko.
- Third party audit.

2
PHASE

ONLY

- Launch influencer marketing push.
- Begin 2# round of community airdrops.
- Cooperate with third wallet, trust wallet, tokenpocket etc.
- Partnership with WSB community.
- 5,000 telegram members.
- 5,000 holders.
- Develop for CryptoDOGS Swap.
- Develop for CryptoDOGS NFT market.
- Launch DAO.

3

PHASE

LIVE

- Launch cross-chain aggregation exchange CryptoDOGS Swap.
- Launch CryptoDOGS Swap liquidity mining.
- Launch CryptoDOGS NFT market.
- Release CryptoDOGS series NFT.
- Release YOLO series NFT.
- Launch NFT mining.
- 20,000 telegram members.
- 20,000 holders.
- Listing on major CEX.

4

PHASE

ONCE

- Launch NFT lending.
- Release WSB series NFT.
- 500,000 telegram members.
- 500,000 holders.
- Launch CryptoDOGS NFT liquidity mining.
- Support dogecoin, ethereum and other public chain.
- Launch Dogcino (casino games)
- Build the world's largest community of CryptoDOGS.
